

Facilitating Effective Data Management

Integrate your iSAMS school management information system (MIS) directly with iTrent.

Remove the burden of duplicate data entry across multiple systems, and benefit from a streamlined and accurate data exchange.

Why is this integration significant to independent schools, colleges, and trusts?

It provides the opportunity to truly leverage the benefits of digital transformation through a standardised interface.

The seamless integration reduces the burden of manual administration tasks your HR teams face, whilst improving efficiency and productivity.

Improve data accuracy

The integration with iSAMS provides data accuracy across both iTrent and the HR Manager module within iSAMS. This improves the management and accuracy of key staff information such as addresses, phone numbers, emails and next of kin details.

By automating the exchange of core HR data, organisations can guarantee people data efficiency across their solutions – delivering improved reporting.

A secure and compliant approach

Adopting this integration ensures a secure and compliant cloud-first approach towards your HR data management. Stay flexible and adaptable with a solution which enhances your operational strategy and maximises productivity through delivering data fluidity.

The data flow between the systems is automated. It adds new and updates existing information (when necessary) from iTrent directly into the HR Manager module on a daily basis. This ensures that both solutions always have the most current and accurate information available.

Reduce time spent on manual tasks

iTrent is paired with your iSAMS system to feed in user, holiday and absence data - saving HR teams critical time through automation. This single-entry approach also provides HR with the benefit of reliable and accurate data to support effective decision making.

Remove the risk and cost associated with inaccurate people data entry, through the adoption of a seamless integration designed to deliver increased efficiency and improved data accuracy across independent schools.

Benefits of the solution

- Reduce manual administration tasks
- Improved data accuracy across your chosen solutions
- Increase productivity through time saving amongst the HR team
- Reduce costs resulting from human error of people data entry
- Enhanced data management and digital strategy

If you're interested in this solution, please contact your Customer Relationship Manager for more information.
