

Ensure Business Continuity With Software Escrow

MHR recognises the importance of an adept business continuity plan. Through our partnership with SES Escrow, we can secure your iTrent solution with software escrow services to deliver better security, improve compliance and strengthen your business resilience.

A software escrow agreement ensures that MHR is obligated to share and store every line of source code, data, and instruction – allowing you to properly update and maintain your iTrent system in the event that you cease working with us.

As well as mitigating supplier risk and minimising disruption within the IT supply chain, software escrow safeguards the investment of your HR and payroll solution. Create peace of mind across your organisation through sourcing a safe and secure backup of your critical business applications. 

With a software escrow agreement in place you will reassure your customers and workforce that you are equipped to overcome unforeseen circumstances, with an additional layer of protection and security procured.
