

Bank Verification and Paid Mileage Made Easy

Enhance iTrent with validation and verification protocols through our partnership with GBG and significantly improve payroll processes and accuracy while reducing unnecessary errors and costs.

Bank detail validation and verification

Payroll fraud is an enormous expense for businesses. It sends payroll teams into an almost endless cycle of payment reclaims with banks. Time spent chasing reclaims impacts productivity and if unsuccessful, businesses are left in a compromised position and at a financial loss.

GBG's integration with iTrent facilitates a flexible two-stage bank detail verification process for employees. The first stage instantly validates sort codes and account numbers when entered into Employee Self Service.

This includes newly onboarded employees as well as existing employees updating payment details. If the details entered are incorrect, users will be presented with configurable instruction on how to progress. The second verification stage ensures the identity matches the registered bank and employee address. GBG services not only safeguard businesses against fraud, but also deliver significant time savings.

Payroll teams will no longer need to routinely register bank branch details into iTrent, as they will have access to an expanding library of banks to select. They will also benefit from simple and streamlined auditing of employee payment details. The integration with GBG reduces admin costs and payment errors while guaranteeing faster, secure payments occurring first time.

Paid mileage

Accuracy across expense claims, particularly mileage, is a challenge for many organisations. Utilising accurate location data through the GBG integration, iTrent Paid Mileage means employees can submit claims with pinpoint accuracy – ensuring they're not over or under claiming.

Mitigate both employee and organisation costs with a solution that simplifies mileage expense claims into iTrents Paid Mileage. Postcode-to-postcode validation, provided by GBG, enhances accuracy and grants access to locations – including those not yet built. The integration into paid mileage enables organisations to combine mileage with other expenses.

Key benefits:

- Safeguard your business against payroll fraud and reduce the time spent claiming payment reclaims, through a user-friendly market-leading solution.
- Eliminate potential errors by providing employees with a secure and simple way to guarantee their bank details are correct.
- 'Library' of bank and branch information stored within iTrent for easy retrieval.
- Save time through the automation of new bank information in iTrent for all employees to use.
- Facilitate better auditing with a clear trail as to where bank details have been obtained.
- Leverage the flexibility of validation services (with or without verification services). Ideal for businesses that don't hold employee address details.
- Enhance the employee experience with a solution that ensures they are paid correctly when joining the business or when they change payment details.

- Boost payroll and finance team productivity by removing manual admin around expenses and bank details verification.
- Provide better visibility over paid mileage claims and locations visited for audit purposes.
- Significantly reduce the time employees spend on expenses by consolidating claims within a single platform.
