

Microsoft Dynamics 365 Finance

Maximise visibility and profitability with Microsoft's ERP solution.

Microsoft Dynamics 365 Finance is a powerful ERP (Enterprise Resource Planning) solution designed to meet the needs of large organisations and those with complex operational requirements. It enables finance leaders to unify and automate finance processes, monitor performance in real-time, predict future outcomes and make better data-driven decisions to drive growth and profitability.

The solution sits within Dynamics 365, Microsoft's flexible suite of intelligent cloud business applications. Thanks to this seamless integration with other Dynamics 365 apps, it becomes easier than ever to connect and unify data and processes. Ease of configuration enables your ERP to be adapted to both the operational needs of the business and the preferences of the finance team.

With Microsoft Dynamics 365 Finance, you can automate repetitive tasks to streamline processes, get paid faster, and reduce errors and fraud. You can also leverage Artificial Intelligence (AI) and 'what if' analysis to create highly accurate forecasts and budgets. Integration with business intelligence solutions makes it possible to analyse, visualise and share key data with insiders from all parts of the business.

Important features of Microsoft Dynamics 365 Finance include:

Automated business processes. Includes automatic processing of vendor invoices, rules and prediction-based collection automation to increase on-time payment, and recurring revenue management.

AI-driven forecasting and budgets. Leverage unified data, AI and 'what if' analysis to develop highly accurate forecasts. Use the intelligent budget proposal feature to consolidate and generate historical data for an accurate and robust budget proposal.

Financial management. Includes in-depth financial reporting capabilities that natively handle foreign exchange and support multiple legal entities and currencies in a single location.

Workflows. Create customisable role-based workflows to maintain full visibility of what needs to be done and when.

Ease of integration. Put Microsoft Power BI to work for consolidated data analysis and reporting. Access a vast range of ready-to-go Microsoft and partner add-ons for industry-specific functionality.

Key benefits

- **Significantly reduce your transactional burden to focus on strategy.** From managing invoices through to closing the books, Dynamics 365 Finance enables you to automate a vast range of repetitive tasks, reduce errors, and focus the expertise of the office of finance on value-added work.
- **Actively monitor the health of your organisation.** Monitor cash flow in real time, react quickly to changing circumstances by instantly generating reliable, up-to-date forecasts in light of new data.
- **Get a joined-up picture of performance.** Connect data and processes across Dynamics 365, Microsoft 365 and other business applications to create a centralised source of information and an accurate view of the entire business.
- **Supporting global growth.** Quickly adapt to varying and changing regulatory requirements with Microsoft's guided, rule-based chart of accounts and no-code/low-code globalisation services to simplify tax calculation, electronic invoicing, regulatory reporting and global payments.
- **Support hybrid and remote working.** Enable authorised users to get real-time information wherever they happen to be based.

As a Microsoft Gold Partner in data analytics and data platform, MHR is ideally placed to enable your enterprise to realise the full potential of Dynamics 365 Finance, including expert input on migration, implementation, training and customisation.
