HR, payroll and finance made easy

Trusted, tailored software solutions for schools, academies, and further and higher education institutions

"We wanted a software provider that was flexible and able to deal with lots of different scenarios and situations."

Richard Taylor
People Director
Leigh Academies Trust

Managing multiple employments a headache?

Centralised employee data means a single record for each individual – regardless of how many positions they hold.

We make it easy to manage variable pays and pension contributions for both academic and non-academic employees who have multiple positions. Our standard suite of reports cater for employees with multiple employments, ensuring accurate management information each and every time.

Say farewell to laborious manual reporting processes.

Term-time only employees a challenge?

Many employees are only contracted during term-time.

Our comprehensive working pattern functionality makes catering for these colleagues straightforward, ensuring that you have an accurate view of your workforce from both a pay and resource perspective.

Helping you maintain flexibility throughout your organisation.

Do you find your pension returns complex?

Pension scheme management can often be complex.

Our Pensions Data Service unravels the complexities for you, ensuring contributions are made accurately, on time and in line with legislative requirements. We support all pension schemes, including LGPS, MCR and USS as standard.

Providing peace-of-mind around pension returns.

MCR

USS

LGPS

Does compliance keep you awake at night?

Do you meet your legislative commitments on time and accurately?

Does this cause stress or anxiety within your team? And does it divert you from other tasks, projects and needs? We can take care of this for you – providing you with confidence and peace-of-mind that all your legislative obligations will be met as needed – including SWC, SCR, SIR and HESA as standard.

Reduce the risk, relieve the pressure.

"Managers feel they have control of their teams, employees feel they have control of their data."

Jayne Billam
Director of HR
Nottingham Trent University
