Vantec Europe Limited

Number of employees:
860

Sector:
Transport, Logistics and Distribution

Solution supplied:
iTrent with Absence, Payroll
and Gender Pay Gap Report Packs

MHR

ABOUT VANTEC

Now part of the Hitachi Transport System group, Vantec Europe started providing logistics and warehousing services to the automotive industry in 1990. They have since extended their range of services and are a preferred third-party logistics provider.

Vantec is based in Washington, Tyne and Wear and has been an iTrent customer since 2012.

WHAT THEY WERE LOOKING FOR

The Vantec payroll team was swamped by paper reports and chasing their tails collating and outputting monthly reports for management. It was a time-consuming manual process. Something needed to change.

Developing the required reports internally would take far too long – “well over a year”. So, they spoke to MHR. They needed a solution that would:

- Deliver required reports accurately and quickly
- Provide flexibility in sourcing and delivering ad-hoc or tailored data and historical information quickly
- Free-up time internally

“IT’S STREAMLINED EVERYTHING AND GIVEN US BIG TIME SAVINGS. IT’S A FANTASTIC REPORTING TOOL.”

LESLEYANNE DOLAN
PAYROLL MANAGER
VANTEC

SOLUTION

To solve their reporting headaches, Vantec licensed a suite of MHR Report Packs, including Payroll, Absence and Gender Pay Gap.

The Payroll Report Pack provides comparisons, exception reports and net pay variance. “It tells us instantly what’s in there, what’s not in there, why something was put in this month or had been put in last month’s and gives us that variation, which is fantastic. That’s the main report we use” said Lesleyanne Dolan, Payroll Manager at Vantec.

In the past the Gender Pay Gap report took the best part of a week to collate, check and run. Using the Report Pack has reduced this to four hours.

The Absence report now provides critical information to HR instantly.

iTrent is constantly evolving and updated. Consequently, the Report Pack suite is kept up-to-date in line with iTrent releases – meaning it’s always consistent with the version used by the customer.

Vantec plans to implement the Employee Self Service and Time and Attendance modules before the end of 2022.

“THE BOARD MIGHT COME BACK TOMORROW AND SAY, ‘WE NEED THIS INFORMATION’ AND IT’S THERE.”

LESLEYANNE DOLAN
PAYROLL MANAGER
VANTEC

RESULTS AND BENEFITS

- Significant return on investment
- Minimal training needed
- Broad suite of report options
- 52 hours of report preparation time reduced to 11 hours – a saving of 79%
- Big improvement in information flow from Payroll to senior management
- Enhanced features such as graphs and month to month variations now included as standard
- Big time saver for both payroll and HR – time freed-up to focus on other tasks and projects
- Ability to quickly generate ad-hoc reports
- Business information (outside of standard reporting) provided to the board quickly for critical business decisions
- Historic data and information easier to retrieve
- Reporting functions available quickly and with minimal testing – no lengthy implementation process
- Report packs reviewed, modified and updated by MHR on a regular basis

Reports are set up and generated with the touch of a button

Absence reports delivered instantly
